Wisconsin Department of Health Services

The Governor’s Office and Wisconsin's Department of Health Services (DHS) have created a phased plan for COVID-19 vaccine distribution. Phase 1b includes front-line essential workers such as public and mental health workers, and food service and retail workers.

UHS (University Health Services) and University Housing have identified facility staff, co-op housing facility, and DHS staff as Phase 1b priority. The vaccine continues to be doled out on an as-needed basis, and we are preparing to work with the University Housing facility staff as we are notified regarding the vaccine.
